EDUCATION

MSc Science and Technology Policy — University of Sussex, 2016-17

BSc Chemistry — Cardiff University, 2011-14

TECHNICAL PROFICIENCIES

Data and development

- Data architecture design
- Python ETL scripting
- Database administration
- Cloud resources management
- Full stack web development (Javascript, Django)
- Productionising ML pipelines
- Research design
- Mathematics (linear algebra, statistics)

Interpersonal

- Data project & programme management
- Information governance
- Data strategy design
- Sprint planning & management
- Technical writing
- Public speaking
- Media liaison

CAREER

Warmer Homes London

Senior Data Architect

2025 - present

As the leading technical member of staff, I'm responsible for all development projects and assets data. My work has included:

- Designing and building/implementing the organisation's data architecture and strategy
- Managing a portfolio of four data research projects
- Hiring and mentoring new analysts and developers
- Chairing technical meetings and panel discussions
- Managing the organisation's technical budget
- Creating & managing the organisation's cloud services
- Building and productionising a full-stack data portal
- Writing and negotiating data-sharing agreements and DPIAs in a highly sensitive, regulated field
- Writing Python ETL scripts

Lewisham Council

Data Scientist

2022 - 2025

Leading on analysis of housing services and homelessness data, including:

- Creating the departmental data strategy
- Combining Random Forest models with GIS to predict locations of houses of multiple occupation, for more efficient deployment of staff on the ground
- Leading cost reduction and case prioritisation work
- Managing all inbound FOI requests, writing scripts to improve processing time and clear backlog

West Midlands Combined Authority; University of Birmingham

Senior Data Analyst

2018 - 2022

Coordinating research projects between regional government and academic institutions, with emphasis on:

- Creating research reports and dashboards for senior stakeholders, including central government and local authority Chief Executives
- Developing and maintaining interactive GIS products, including an ArcGIS dashboard of 5G infrastructure presented to the Secretary of State for DCMS
- Extensive use of Python, Tableau, QGIS, and SQL
- Application of statistical methods such as OLS, descriptive statistics, and Knn imputation

ACCREDITATIONS

- Certified in PRINCE2 (Practitioner)
- Certified in HM Treasury's Better Business Cases qualification (Practitioner)

BEYOND WORK

- I lead an open-source data science project which collects and collates local authority planning data to evaluate the effects of new planning policies.
- I'm building a comprehensive dataset and visualisation tool for UK emigration, by combining domestic data with immigration records from other countries. The objective is to contribute to a policy debate which currently lacks a consistent evidence base.

In spare time I enjoy cooking, reading about history and philosophy, and playing the guitar.
